EXPERIENCE

Computer Engineer

Bounce Imaging

Jan 2021 – Current Remote (New York, USA)

- Lead development for a critical production web application using Ruby on Rails.
- Containerized existing server setups for easier deployments and continuous delivery.
- Designed, developed and deployed a MRP system, including automatic alerts and predictions for component shortages based on market availability.
- Implemented monitoring, including synthetic tests and alerts for a business-critical video streaming service.

Director & Lead Developer

www.cpokemon.com

Jun 2013 – Ongoing Costa Rica

- Led development, design and maintenance of the whole website.
- Sysadmin for dedicated CentOS server.
- Developed a WordPress-based site with more than 5000 posts and 50 000 comments.
- Integrated a combination of caching technologies such as Varnish, ensured high availability of a dynamic web application with more than 2 million monthly users and 10 000 concurrent users.
- Currently working on transitioning to a serverless / cloud architecture using a headless CMS and Vue.js, while preserving legacy PHP content.

Software & Hardware Developer

Solve IT Solutions

Jun 2019 – Oct 2019 San Ramón, Costa Rica

- a real-time, low-bandwidth, low-power tracking system and web-based UI for specialized tools.
- Designed back-end architecture in Node.js (Nest.js).
- Implemented RPC services for communication across microservices in an existing Java project.

TECHNICAL SKILLS

Web development | WordPress | Google Cloud | Ruby on Rails | NodeJs | TypeScript | PHP | Vue.js | Angular | Progressive web apps

Python | C & C++ | Java | Arduino | ARM & RISC-V Assembly | Docker

EDUCATION

B.Eng. in Computer Engineering

Tecnológico de Costa Rica

2016 – Ongoing Cartago, Costa Rica

International Baccalaureate Diploma Programme

Colegio Bilingüe de Palmares

2014 – 2015 Palmares, Costa Rica
